

TECHNICAL DATA SHEET

Brake cleaner spray

Product description

Brake cleaner spray based on one special variety from Special gasoline. Through the high evaporation rate produces an optimal cleaning effect in the short term. Brake cleaner spray is non-corrosive and does not attack rubber and plastic parts (self-testing definitely required).

Application instructions

Brake cleaner spray is suitable for quickly cleaning drum and disc brakes, brake pads and brake blocks as well as clutch parts. Also for cleaning heavily oiled surfaces and dirty machine parts.

Processing instructions

Spray onto the contaminated surface at a distance of approx. 20 cm and allow to run off. In case of heavy contamination repeat the process several times. For container goods, apply and drain with a cloth, brush or spray gun.
